Like wearing nothing at all

Patients can sleep how they want with the freedom and comfort of DreamWear

The Philips Respironics DreamWear frame supports full face, nasal and gel pillows cushions to meet patients' needs. DreamWear's remarkable design directs airflow through the frame so patients can sleep comfortably, and the tubing connection located at the top of the head allows patients to sleep in any position they desire—on their stomach, side, or back.

Users told us that DreamWear gave them more freedom to move, had a better fit than their prescribed mask, and comes closest to making them feel like they don't have anything on their face during therapy.*

* DreamWear Under The Nose: Data analysis at 30 days of use of 2015 Philips sponsored patient preference trial (n=98). Prescribed masks include ResMed Swift FX, ResMed Mirage FX, Philips Wisp, and ResMed P10. DreamWear Gel Pillows: Data analysis at 30 days of use of 2017 Philips sponsored patient preference trial (n=80). Prescribed masks include Resmed Swift FX and P10, F&P Opus and Pilairo, and Philips Nuance and Nuance Pro. Data analysis at 30 days of use of 2017 Philips sponsored patient preference trial (n=80). Prescribed masks include Resmed Swift FX and P10, F&P Opus and Pilairo, and Philips Nuance and Nuance Pro. DreamWear Full Face: Data analysis of Aug 2017 Patient Preference trial where n = 85 and prescribed masks include Resmed Airfit F10 and F20, Respironics Amara View and F&P Simplus.

DreamWear

Soft silicone frame
Light, flexible material designed for comfort.

Open field of vision
Wear glasses, read, and watch TV.

No red marks*
Leaves no marks on the bridge of the nose.

Innovative
Under-the-nose design.

Top-of-head tube connection
Provides freedom of movement throughout the night.

In-frame airflow
Unique design allows airflow through the frame to help patients sleep comfortably.

Interchangeable cushions
Easily switch between full face, nasal and gel pillows cushions.

*Mask does not directly contact the bridge of the nose or nostrils.

One mask

fits all three cushion types

Simply switch cushions without changing masks

Choosing the right mask for your patients is one of the most difficult jobs you face. The non-stop trial and error involving the masks, cushions, and headgear needed to fit your patients becomes tedious and time-consuming.

On top of that, you must manage patients in their initial acceptance period who struggle for a variety of reasons including poor fit, leaking, nasal congestion and others.

Now, DreamWear's design allows you to quickly and easily switch between full face, nasal and gel pillows cushions without changing masks. With fewer mask decisions to make, you can focus on what's really important: your patients.

Benefits

- Can accommodate full face, nasal and gel pillows cushions
- Allows for easy switching between cushion types
- May reduce the number of masks needed to set up a patient
- Helps streamline the amount of inventory to be managed
- Can increase efficiency by requiring education on only one mask

Clinicians rated the DreamWear mask with nasal and gel pillows cushions as taking less time to change than another pillows mask and nasal mask.*

* Data taken from December 2015 ease-of-use trial involving

DreamWear **patient fitting guide**

Follow the instructions to get started fitting your full face, nasal or gel pillows mask

Full face

Using the full face sizing gauge, hold horizontally under the nose and select the cushion size based on where the outer edge of your nostrils and tip of your nose contact the gauge. **Note: Four cushion sizes (small, medium, large, medium-wide) are available.**

1  The cushion opening will be directly under the nostrils. The cushion will hug the nose and mouth, and leak will be minimal.

Note: At no time should the nose be inside of the cushion opening. If any part of the cushion overlaps the nose, the cushion is being worn incorrectly. A different size cushion may be needed.

2  With the mask assembled, place the cushion under the nose.

3  Position the frame on the top of the head. Pull the headgear over the back of the head.

4  Attach the magnetic headgear clips to the mask cushion.

5  To adjust the mask, peel the headgear tabs away from the fabric. Adjust the length of the top straps. Press the tabs back against the fabric to reattach. Repeat this step with the bottom straps.

Note: Do not overtighten the headgear.

6  Position the mask until it fits comfortably. When finished, the elbow should rest at the top of the head.

Note: Please read the Instructions for use for further fitting information.

Nasal

Using the nasal cushion sizing gauge (included with the mask), hold it horizontally under the nose. Select the cushion size based on where the outer edge of the nostrils and tip of the nose contact the gauge.

Note: Four cushion sizes (small, medium, large, medium-wide) are available.

1  The cushion opening will be directly under the nostrils. The cushion will hug the nose and leak will be minimal.

Note: At no time should the nose be inside the cushion opening. If any part of the cushion overlaps the nose, the cushion is being worn incorrectly.

2  With the mask assembled, place the cushion under the nose.

3  Position the frame on the top of the head. Pull the headgear over the back of the head.

4  To adjust the mask, peel the headgear tabs away from the fabric. Adjust the length of the straps. Press the tabs back against the fabric to reattach.

Note: Do not overtighten the headgear.

5  Position the mask until it fits comfortably.

6  When finished, the elbow should rest at the top of the head.

Note: Please read the Instructions for Use for further fitting information.

Gel pillows

Using the gel pillows sizing gauge, place the pillows cushion tips into the nostrils. Choose the cushion size that allows the blue gel bases to sit comfortably under the nose without any gaps.

Note: Three cushion sizes (small, medium, large) are available.

Making it simple to find the right fit

Achieving the right fit with DreamWear is easy

Medium frame sizing

The medium mask frame will comfortably fit most faces. If the medium frame does not fit a patient's face, a small or large mask frame might better suit your patient's needs.

Medium correct frame

Proper fit

Large frame sizing

Mask too small

Large correct frame

Proper fit

Small frame sizing

Mask too large

Small correct frame

Proper fit
